

**European Network of Breast Development and Cancer Laboratories
(ENDBC) www.enbdc.org**

Weggis, Switzerland 9-11 March 2017 Program

Thursday afternoon

Session 1: Nuclear receptors (chair Maria Vivanco, Bilbao)

Jason Carroll, CRUK, Cambridge, UK

Estrogen Receptor action in breast cancer

Leoni Young, RCSI Dublin, Ireland

ER signalling in breast cancer

Tan Ince, University of Miami, USA

Taxonomy of Breast Cancer Based on Normal Cell States

Reuven Agami, NKI, Amsterdam, Netherlands

Functional genetic screens for cancerous regulatory DNA elements

3 short talks from abstracts

Thursday evening

Session 2: Poster session

Friday morning

Session 3: New culture techniques (chair Momo Bentires Alj, Basel)

Lone Ronnov-Jessen, University of Copenhagen, Denmark

The putative origin of hormone receptor-positive breast cancer: Estrogen receptor-positive cells and their stromal microenvironment

Oded Kopper, Hubrecht Institute, Utrecht, Netherlands

Organoids as a novel platform for breast cancer research

Pierre Nassoy, University of Bordeaux, France

Microencapsulation technology for in vitro tumour models

Nicola Aceto, University of Basel, Switzerland

Circulating tumor cell clusters as precursors of breast cancer metastasis

3 short talks from abstracts

Friday afternoon

Trip to the Rigi Kulm

Friday evening

Session 4: Poster session

Saturday morning

Session 5: Proteomics (chairs Romain Amante and Katrin Wiese, Basel-Amsterdam)

Janne Lehtiö, Karolinska Institute, Sweden

Breast cancer proteogenomics - from genotype to phenotype by proteomics

Simone Lemeer, Utrecht University, The Netherlands

Proteomics approaches for the analysis of drug resistance

Bernd Bodenmiller, University of Zurich, Switzerland

Single cell proteomics, tumour heterogeneity and the tumour microenvironment

3 short talks from abstracts
