

**POSITION FOR RESEARCH ASSISTANT  
IN GONZALEZ-SUAREZ LABORATORY (CNIO)**

**TECHNICIAN POSITION**

---

The Transformation and Metastasis group led by Dr. Eva González-Suárez at the CNIO <http://www.cnio.es>, in Madrid, Spain offers a research assistant position starting at January 2021.

Main responsibilities include:

- Management of mouse colonies and genotyping,
- Support for histopathology and basic laboratory techniques.

The primary goal of Dr. Eva González-Suárez's laboratory is to understand the signaling pathways implicated in epithelial stem cell fate, their alterations during cancer and metastasis, and the interactions between tumor cells and microenvironment. We have a multidisciplinary approach using mouse models, cell cultures, clinical samples and molecular and cell biology techniques to translate basic research into clinically relevant results. The laboratory of Dr Gonzalez Suarez is funded by national grants and a European Research Council ERC-Consolidator grant.

**REQUIREMENTS**

---

Candidates must have:

- Technical degree in Biological Sciences or equivalent
- Certifications in animal handling and experimentation
- Laboratory experience

**WE OFFER**

---

- The opportunity to contribute to cutting-edge research projects and work closely with an international team of scientists and work in one of the leading labs in Europe.
- A 2-year full time contract, immediate start. Renewal based on performance.

**APPLICATION**

---

- Applications must include a CV with a cover letter and contacts for 2 references
- Apply at <https://www.cnio.es/en/about-the-cnio/employment-opportunities/> and send an email to: [egonzalez@cnio.es](mailto:egonzalez@cnio.es) . Please, clearly state in the subject of your email "Technician Position".
